## SENDactive Kurling Challenges | Scoresheet

Print this scoresheet as many times as required and use it for your own records before submitting scores via the SENDactive Partner School Dashboard at www.sendactive.org. Please store this document securely (adhering to your school procedures), to allow for overall winning individuals and teams to be identified, as participant identifiers will not be asked for when submitting your scores.

Remember that each attempt involves releasing four or five stones, depending on the challenge. For example, one attempt for "Hit the Target" could score up to 80 points ( 20 points $\times 4$ stones).
